Egypt, bani-suaif

PROFILE SUMMARY

I'm Ahmed Khaled, a Front End Developer specializing in the MERN stack, with nearly 2 years of experience as a Front End . During this time, I have developed robust, scalable applications using React.js, Nextjs, Gatsby. My strong understanding of JavaScript and its associated libraries and frameworks allows me to create efficient, maintainable code. I excel in problem-solving, teamwork, and continuously learning new technologies to improve my skills.

PROFESSIONAL EXPERIENCE

Front-End Developer Etrevago - Jordan   Remotely - part time   **Oct 2022 - May2023**

Integrated APIs: Worked closely with backend developers to integrate RESTful APIs, enhancing the functionality of web applications.

Led Frontend Development: Took ownership of frontend development for several projects, ensuring timely and high-quality delivery.

Front-End Developer Developer TCG- Egypt - Nasr-city   Remotely - part time   **Oct 2023 -Present**

I**mplemented Advanced Features**: Developed advanced features such as dynamic routing, server-side rendering, and state management using Redux.

Improved Code Quality: Established coding standards and best practices, leading to a more maintainable and robust codebase.

Full-stack (Mern) Developer Upwork   Freelancing   **Oct 2022 -Present**

Architected Scalable Solutions: Designed and implemented scalable frontend architectures, leveraging the strengths of React.js and Next.js.

Conducted User Testing: Performed user testing and usability studies to gather feedback and make informed improvements to the user interface.

---

LIVE PROJECTS

Infolio-theme
Infolio is a very creative theme for agencies portfolios have a very smart animations with gsap library it's have over 20 pages I implemented it with three version Reactjs. and one with Nextjs and one With Nuxtjs

Nigeria Market
it's a free online marketplace for buying and selling products in Nigeria. For sellers, too it's have all features that you will need in Profissional E-commerce built with reactjs - Nodejs

Dashboard System for Companies
This is a company dashboard web application built using Next.js 13, Tailwind CSS, and Next-Auth for authentication. The dashboard allows the company to manage and control various aspects of their system.

Aballey Portfolio
Here is the portfolio of Aballey company with very controlling dashboard and dynamic data implemented with Reactjs - Nextjs -Typescript and backend with nodejs - postgress

Archin
Archin is an "Architecture & Interior Template" is perfect it's a clean and modern Nextjs project
